Hopi Tribe hosts Arizona State Transportation Board Meeting

ADOT Board members arrived on the Hopi Reservation September 14 and were provided a tour of Hopi and a dinner was hosted by the Hopi Department of Transportation (HDTO) at the Hotevilla Youth/El-

ement Center.

The Transportation Board meeting was held at the Mokwee Cultural Center. The Board has the authority to investigate the impacts of Peabody pumping on Blue Spring.

45 billion gallons of water was pumped to support coal mining and the coal slurry pipeline. The groundwater pumping of water from highly pressurized Black Mesa aquifers started in 1970 by Peabody Coal Mining Company. By the end of year 2005, over 45 billion gallons of water was pumped to support coal mining and the coal slurry pipeline.

The answer is: “Do you support the ongoing Little Colorado River (LCR) Water Rights Settlement negotiations, and why?”

The important question the candidates for Chairman and Vice Chairman must answer is: “Do you support the ongoing Little Colorado River (LCR) Water Rights Settlement negotiations, and why?”

The question is, is it wise for the Hopi Tribe to continue to participate in the LCR Water Rights Settlement negotiations? When, and if, the LCR Hopi water negotiation team reaches a settlement agreement, the Hopi Tribe would be legally bound to accept the terms of that agreement.
